Valentin de Saint Jacob

Student at Epitech Paris

3rd year student at Epitech Paris, I am actively looking for a **part-time (October 2020)** and/or a **6 months internship (April 2020)**. I am interested in **software** or **web development** but I am also really curious about newer technologies, especially like **A.I.** (I did a Google introduction to machine learning for the basics), and I would love having a professional experience in any of those fields.
